

About Me

As a recent graduate in Interior Design, I am enthusiastic about the opportunity to support and collaborate with designers in the industry. With a background in CAD and strong space planning abilities, I am actively seeking a fulfilling role as an assistant or team member. My aim is to further develop my skills while leveraging my expertise to contribute as a dedicated member of your team in the interior design sector. By offering my assistance, I aspire to assist your business in delivering exceptional results to your clients.

Designing (2021-2022)
**Interior Design Institute (Le Mark
school of Art)**

Recent Projects

4-6 weeks A. Residential case study

Client Brief/Problem statement:

A single parent with precise specifications listed in the brief wants to redesign a dilapidated two-story building. In addition to the redesign, the brief called for an expansion of the property and an open-concept living arrangement.

Strategy:

- A complete checklist of specific requirements and cost constraints.
- Analysis and evaluation of the current site and its conditions
- Proposed new floorplan which checked every requirement from the list
- Approval process

Solution Proposed:

The proposed solution addressed all of the client's requests while preserving the structural integrity of the property and the interior was the minimalistic and modern aesthetic which was highly appreciated.

More details are show-cased in portfolio.

4 weeks B. Commercial case study

Client Brief/Problem statement:

The customer, an interior designer, recently bought an office space, and the task was to manage the area in the most effective way possible to accommodate the client's requirements, which included a recreation area, meeting rooms, a pantry, and office spaces.

Strategy:

- Analyse & evaluate the site from a measurement perspective
- Understanding the client's style & preferences
- Budget decisions based on styling and preferences
- Designing a solution which fits well for the client

Solution Proposed:

- The solution process included researching different styles, creating mood boards, and contextually sourcing materials
- Based on the nominated style preference, a floor plan was proposed
- Post approval, 3D model designs were created and executed on the final solution
- More details showcased in the portfolio
